Capability Statement

ISSUE 01 · DD/MM/YYYY · REVIEW ANNUALLY

How to use this document. Every field shown *like this* must be completed with verified information before this document is issued to a client, principal contractor or procurement team. Do not state an accreditation without its registration number and expiry date — PQQ teams verify both, and an unverifiable claim is treated as a failed submission.

SPECIMEN

Contract works			

CERTIFICATES AVAILABLE ON REQUEST AND ISSUED WITH EVERY TENDER RETURN

5 Technical capability

DESIGN STANDARD	Structures erected to **TG20:21** compliance. Anything falling outside TG20 — cantilevers, temporary roofs, extreme height, restricted or poor ground — receives a bespoke design with supporting calculations before mobilisation.
DESIGN OUTPUT	TG20 compliance sheet, or bespoke CAD drawings and structural calculations
MAXIMUM HEIGHT UNDERTAKEN	_____
LARGEST CONTRACT VALUE	_____
PLANT AND STOCK HELD	_____ tonnes of tube and fitting / system scaffold

6 Personnel and competence

DIRECTLY EMPLOYED OPERATIVES	9 scaffolding operatives, plus 5 LGV drivers — labour is not sub-let
CARD LEVELS HELD	CISRS Advanced Scaffolder ×2 · Part 2 ×4 · Part 1 ×1 · Trainee ×2
SUPERVISION	CISRS Scaffolding Supervisor on every contract
ADDITIONAL CERTIFICATION	Asbestos awareness — every operative
TRAINING RECORDS	Held centrally, produced on request, checked before mobilisation

7 Health, safety and environment

H&S POLICY	Written policy reviewed annually, issued with every tender return
COMPETENT ADVICE	THSS (Kelvin Smith), retained as external health and safety advisers, 02/09/2026 to 02/09/2027
RIDDOR REPORTABLE INCIDENTS	_____ in the last three years
HSE ENFORCEMENT ACTION	_____ STATE NONE, OR GIVE FULL DETAIL
ACCIDENT FREQUENCY RATE	_____
WASTE AND ENVIRONMENT	Materials returned to depot for reuse; site cleared on strike

8 Documentation issued as standard

BEFORE MOBILISATION	Risk assessment and method statement (RAMS), specific to the structure and the site
ON COMPLETION	Handover certificate stating design basis, permitted loading and duty class
ON THE STRUCTURE	Signed scaff tag at every access point, dated and legible
EVERY SEVEN DAYS	Statutory re-inspection under the Work at Height Regulations 2005 reg.12, recorded and copied to the client for as long as the structure stands
ON STRIKE	Dismantled to programme, site left clean, permits closed

9 Coverage

Portsmouth, Southampton, Chichester, Winchester, Fareham, Gosport, Havant, Waterlooville, Petersfield and the South Coast, with regular work in Staines, Slough, south London, Oxford and Swindon. Work outside this area considered on application.
